NexaLiving

One Platform. Every Community Need.

Society Management • Community Support • Local Services

NexaLiving is a modern, user-friendly platform designed to bring residents, services and society management together — making community life easier, safer and more connected.

Project Team

Built together for a better community

- **Syed Waleed Ali** — Project Leader
- **Muhammad Anas** — Team Member
- **Maliku Abdul Moiz** — Team Member
- **Abeer Raees** — Team Member

Executive Summary

A smarter way to manage your society

NexaLiving is a comprehensive society management system that connects residents, streamlines daily activities and builds a stronger community. It provides a central platform for local services, events, communication and support — all in one place.

Key Features	Unified Platform	Community	User Focused

Key Features

Everything your society needs, in one place.

Tutor ↔ Student Connect
Students can find verified tutors based on subject, class, area and budget. Tutors can accept or reject requests.

Event Space Booking
Residents can request community spaces for family functions and events. Select date, time and provide event details. Admin reviews and approves the request.

Need → Match
Post a need (e.g. "I need a drill machine for 2 hours") and nearby residents can respond. Easy, fast and trusted.

Announcements
Stay updated with the latest society news, notices and important information.

House Rentals
Find or post houses for rent within the community.

Local Services
Access trusted plumbers, electricians, technicians and more, all from your area.

Carpooling
Share rides, reduce costs and travel together.

Nearby Doctors
Find and connect with nearby doctors and healthcare services.

Local Deals
Get special offers and discounts from local shops and businesses.

Emergency Alerts
Receive instant alerts for emergencies, safety updates and important notices.

Verified Family Support
Help and support for needy families, verified by the community.

Community & Trust
Verified users, safe interactions and a transparent community platform.

System Architecture & Technology

Built with modern technologies for a reliable and scalable solution.

Mobile App (React Native) → **Backend** (Node.js + Express.js) → **Database** (MongoDB) → **Authentication** (JWT) → **Hosting** (Cloud / Firebase)

Modern, scalable and secure architecture to ensure smooth performance and a great user experience.
